

# SYMBIO

## Biomonitoring System

Early warning system against contamination of water at water intakes

## ADVANTAGES:

- second-to-second information about the quality of drawn water,
- a quick and unambiguous signal in case of a radical, adverse change in water quality,
- a powerful tool to counteract water safety crises,
- facilitating the Water Safety Program,
- a complement to traditional laboratory tests,
- maintenance-free system,
- reliability.

### The SYMBIO Biomonitoring System's operation diagram

#### Water Monitoring

#### Water contamination - ALARM

We are monitoring water for 10 million people.

- ▶ underground intakes
- ▶ surface intakes
- ▶ infiltration intakes
